Program Yeterlilikleri/Program Outcomes
1. Have a broad foundation and intellectual awareness with exposure to mathematics, history, economics, computing and social sciences.
2. Demonstrate knowledge and skills in different functional areas of business (accounting, finance, operations, marketing, strategy, and organization) and an understanding of their interactions within various industry sectors.
3. Apply theoretical knowledge, employ strategies and use creative, analytical, and critical thinking to manage complex technical or professional activities or projects.
4. Exhibit an understanding of global, environmental, economic, legal, technological, and regulatory contexts for business sustainability.
5. Demonstrate individual and professional ethical behavior and social responsibility.
6. Demonstrate responsiveness to ethnic, cultural, and gender diversity values and issues.
7. Use written and spoken English effectively (at least B2 level) to communicate information, ideas, problems, and solutions.
8. Demonstrate skills in data acquisition, modeling, storage, analytics and mining, interpretation, and information dissemination methods and systems.
9. Demonstrate computing, networking, and systems analysis and design proficiency to support problem solving and decision- making.
10. Demonstrate teamwork, leadership, and entrepreneurial skills.
11. Display learning skills necessary for further study with a high degree of autonomy.
